

**YOUR MOST CRUCIAL INFORMATION,  
DATA AND CHERISHED PHOTOGRAPHS FOR TOTAL  
PEACE OF MIND AGAINST ANY ODDS.**

The systems recovery disk that comes with your home or small business computer will not recover your personal files. What this means is that any documents or photographs you have created or scanned into your computer since the day you bought it, can be lost if your computer is stolen or disaster strikes.

Your data is important. SureStor Data Back-up and Storage keeps your data in a safe and secure offsite location in case disaster strikes.

Don't let a failed hard drive, a lightning strike or other catastrophe ruin all of your precious photos, documents, music, videos, contacts, and other files. Sign up for SureStor by WCTA today! After all, can you put a price tag on your memories and valuable documents?

**With SureStor you can rely on...**

- Easy to use online backup software with Explorer like interface.
- No upfront investment for software, hardware or tapes. No ongoing costs for backup operations or network administration.
- Scheduled automatic online data backup scheduled at your convenience for hands-free backups.
- File selection filters so you can easily select only your most important photos and data.
- SureStor™ is so secure that it is compliant with the security requirements of the HIPAA Act that mandates the healthcare industry.
- SureStor™ transmits the data you select to store to an offsite backup data center with the following security features: 24×7system administration, full systems redundancy and cyber-locked door.

**Available Packages**

Amount of Storage	Price Per Month
Up to 10 GB	\$ 5.95
Up to 50 GB	\$ 9.95
Up to 250 GB	\$ 14.95

SureStor has a one-time \$4.00 Set Up Fee.

## **QUESTIONS & ANSWERS:**

### **Q. How much does it cost?**

A. The pricing starts out at \$5.95 per month for 10 Gigabytes of space. That's enough to back-up roughly 1,600 pictures or 2,000 mp3 files or 10,000 Word documents, or 100,000 e-mails.

### **Q. Can I mix and match rate plans?**

A. Yes. Although combining plans wouldn't make sense unless more than 250GB of storage is needed.

### **Q. How do I retrieve my data if my computer crashes?**

A. Once the computer (or new computer) is up and running again, you'll need to download the SureStor program, put in your username and password, click on the restore tab, select the files you'd like to restore and click the "Restore Now" button.

### **Q. Is it safe to put my personal and vital documents out on the internet?**

A. Yes. Your files are encrypted (locked with a key only you have) before they leave your computer. Only you possess that key (your password).

### **Q. Can I back up more than one computer with one SureStor plan?**

A. No. Each computer would need its own unique username and password to do a back-up. However, if the computers are networked together (wireless or wired) and are sharing documents, those shared documents can be backed up from both computers with one username and password.

### **Q. How long will it take to do a back-up?**

A. Depending on how fast your internet connection's upload speed is, the size of the files, and the number of files, it could take anywhere from a few minutes to a few days.

### **Q. Do I need to leave the computer on?**

A. Yes, until the back-up is finished. SureStor can be set to automatically turn off your computer after the back-up is complete.

### **Q. What do you suggest as a back-up schedule?**

A. Daily would probably suit most people's needs.

### **Q. How fast will my order be processed if I were to sign up?**

A. The goal is one business day.
